Summary

I am an **AI** and **Data Science** graduate with a strong foundation in data analytics, big data technologies, and software engineering. Skilled in Python, SQL, and functional programming, I enjoy solving complex challenges, optimizing data systems, and bridging technical solutions with business needs. I thrive in dynamic environments, value collaboration, and am eager to learn and adapt to new technologies to drive impactful solutions.

Experience

Big Data Consultant

Sweden, Remote

Seamless Distributed Systems

May 2025 –

- Deploy, configure, and continuously improve **data and analytics solutions** across customer environments.
- Design, develop, and maintain **ETL and data integration pipelines** using **Python, PySpark, Prefect, and Apache Iceberg**.
- Monitor and troubleshoot **data pipelines and workflows**, performing root-cause analysis and resolving production issues.
- Perform **data exploration, validation, and analysis** using **Jupyter Notebooks** to identify anomalies and operational insights.
- Manage and support **Docker environments**, including deployments, configurations, and production operations.
- Collaborate with **customers, product, engineering, and support teams** to gather technical requirements, troubleshoot issues, and improve data solutions.

Reinforcement Learning Research Intern

Paris, France

Grettia, Gustave Eiffel University

Apr 2024 – Sep 2024

- Leading a project to optimize traffic management using Reinforcement Learning (RL).
- Conducting extensive literature reviews to identify research gaps.
- Simulating traffic scenarios using the Simulation of Urban Mobility (SUMO) tool.
- Using RL strategies for effective traffic control.
- Analyzing traffic metrics and penalizing collisions for realistic simulations.
- Achieving improvements in traffic flow and congestion reduction with autonomous vehicles.

Software Engineer Intern

Algiers, Algeria

Fentech ai

June 2023 – Oct 2023

- Designed and implemented a tailored database system for Algerian Cinema Digital Archives, streamlining data management, utilizing Python and Django for efficient development.
- Developed robust unit tests to ensure reliability, following industry best practices.
- Dockerized backend for optimized deployment.
- Integrated a chatbot into the web interface, enhancing user engagement.
- Conducted web scraping for data synthesis, enriching project resources.

Machine Learning Engineer Intern

Remote

Technocolabs Softwares

Oct 2022 – Nov 2022

- Worked on 'Borrowers Credit Risk Modeling' initiative for the Bondora P2P lending platform.
- Executed a multifaceted approach encompassing data preparation, cleaning, EDA, modeling, and deployment.
- Orchestrated comprehensive data preparation procedures to ensure dataset integrity.
- Employed advanced data cleaning techniques to enhance data reliability and accuracy.
- Conducted thorough exploratory data analysis (EDA) to extract meaningful insights.

- Leveraged sophisticated modeling techniques to develop robust credit risk models.

Technical Skills

- **Programming & Data:** Python, SQL, Pandas, NumPy, PySpark
- **Data Engineering:** ETL, Data Pipelines, Data Integration, Apache Iceberg, Prefect
- **Data Science & AI:** Scikit-learn, TensorFlow, NLP, Reinforcement Learning
- **Databases:** PostgreSQL, SQL
- **Data Visualization:** Power BI, Matplotlib, Seaborn
- **DevOps & Infrastructure:** Docker, Bash, Virtual Machines
- **Authentication & Access Management:** Keycloak
- **Version Control:** Git, GitHub
- **Development Tools:** Jupyter Notebooks, VS Code, Google Colab

Education

École supérieure en Sciences et Technologies de l'Informatique et du Numérique, Algeria *Sept 2021 – Sep 2024*

Masters in Artificial Intelligence and Data Science

- **Coursework:** Deep Learning, Machine Learning, Data Science, Big Data, SQL Databases, Cloud Computing, Networks, Natural Language Processing

École Nationale Supérieure d'Informatique (Ex. INI), Algeria

Two Years of Preparatory Classes

Sept 2019 – Sep 2021

- **Coursework:** Algorithmic, Algebra, Calculus, Probability and Statistics, Object oriented programming, Mathematical Logic
